

MEXICO CITY –  
FIRST GLOBAL CHALLENGE

The slide features a dark blue background with white decorative circuit-like lines in the corners. These lines consist of straight segments connected by small circles, resembling a network or data flow diagram. The main text is centered and written in a clean, white, sans-serif font.

The FIRST Global Challenge invites each country to send a team to compete in our robotics olympics, which takes place in a different nation each year. Themed around the 14 Grand Challenges of Engineering identified by National Academy of Engineering, each year a different Grand Challenge takes center stage in an effort to foster understanding and cooperation among the youth of the world as they use their abilities to solve the world's problems. The challenges we face as a global society need to be solved, and the next generation can meet the task — together.
